

This listing of claims will replace all prior versions, and listings, of claims in the application:

The Status of the Claims

1. (Currently amended) A transferring method for transferring a thermal transfer sheet in which a hologram or a diffraction grating is laminated on a base material film comprising:

moving a heat source of a unit area in a predetermined direction, wherein

a the predetermined direction of heating sequentially by a the heat source is set to be of a minute-area unit and a direction in which parallax information exists of recorded information for enhancing optical effects of the hologram or the diffraction grating coincide with each other.

2. (Original) The transferring method according to claim 1, wherein the heat source is a heat generation element of a thermal head.

3. (Original) The transferring method according to claim 1, wherein the heat source is a laser.

4. (Previously presented) The transferring method according to claim 1, wherein the hologram is a rainbow hologram.

5. (Currently amended) The transferring method according to claim 1, wherein the hologram is a computer hologram ~~in which a interference pattern is formed in an interference pattern forming range constructing a whole of the hologram, the interference pattern being composed having interference patterns each being formed as of an band-shaped element range as a unit obtained by slicing the interference pattern forming area in a horizontal direction.~~

6. (Withdrawn) A transfer object in which the hologram or the diffraction grating is transferred by the transferring method according to claim 1.

7. (Withdrawn) A transfer object in which the hologram or the diffraction grating is transferred by the transferring method according to claim 2.

8. (Withdrawn) A transfer object in which the hologram or the diffraction grating is transferred by the transferring method according to claim 3.

9. (Withdrawn) A transfer object in which the hologram or the diffraction grating is transferred by the transferring method according to claim 4.

10. (Withdrawn) A transfer object in which the hologram or the diffraction grating is transferred by the transferring method according to claim 5.
